

Excel Smart Chart Generator - Test Instructions

Test Instructions

Please follow the steps below to validate the Excel Smart Chart Generator Add-in:

1. Open Excel (Desktop or Online).
2. Load the Add-in via the manifest file or AppSource installation.
3. Select a data range (with a header row), e.g., a table with Date, Revenue, Profit.
4. Click the "Bind Selected Data" button in the Add-in pane.
5. The chart should render automatically below the control panel.
6. Use the control panel to configure chart features:
 - Chart Type (Bar / Line / Pie etc.)
 - Chart Title (e.g., "Data Analysis Chart")
 - Animation and 3D toggles
 - Display options (Legend, Grid, Tooltip)
7. The chart should update dynamically based on any configuration changes.

Test Accounts / Credentials

- This Add-in does NOT require any login to access full features.
- There are NO in-app purchases or license keys required for testing.

Compatibility Notes

- Fully compatible with Excel Desktop (Windows) and Excel Online.
- Recommended to use Microsoft 365 Excel version for best experience.
- Requires Office JavaScript API v1.1+.
